

Church of God of Prophecy International Offices

Important Announcement

Regarding Employee Benefit , Human Resource and Benefit Administration Offering through NFP Corporate Services (CO)

For many years, the International Offices has been interested in finding an affordable healthcare option for our ministers. Over those years, we have explored a number of options without success. A little over a year ago, we made a connection with NFP that seemed to show promise for our pastors, overseers, and full-time staff members in the United States.

NFP Is a leading national insurance broker and consultant that provides employees benefits, property & casualty, retirement plans, health insurance, and individual private client solutions. They are headquartered in New York with corporate offices in Austin, TX. NFP has over 5,400 employees and 60,000 corporate clients including many faith-based organizations.

For this possibility to become a reality, we need help from every full-time ministry staff member in the United States. This would include pastors, overseers, and full-time staff at the state, regional, and local levels. It is very important for each of you to participate in the NFP survey. Your response does not commit you to anything, but it does help open this door of opportunity for our others who need an option for insurance coverage. If everyone does not, at least, participate in the survey, we will be unable to move this project forward.

Thank you in advance for participating in the NFP survey.

Paul Holt
Executive Director of Finance & Administration
